

October 14, 2012

The craftsmanship that Superior Cooling provides is the best I have ever seen in my 35 plus years in the heavy diesel business. The years I have worked with Superior Cooling they have always provided me with a cooling package that has met the cooling needs of the application. Wes and Mark have the knowledge in cooling systems to build a product that I have trust will meet and exceed the cooling requirements for the application in the extreme conditions.

I highly recommend Superior Cooling for any cooling system repair requirements whether it is replacing an OEM cooling package or upgrading to handle changes where additional cooling and heat rejection are required.

Sincerely,
